Subject: State of Nebraska Employee Performance Management System Announcement

This note is being sent to all DHHS employees.
Please share with employees who do not have email access.

You will soon receive an e-mail from the Department of Administrative Services which is being sent to all State of Nebraska employees. This e-mail will announce that a new statewide performance management system for all code agencies is being deployed and will be live effective January 1, 2013.

This communication is to inform you that DHHS will be moving to this new system. This system is housed in the Employee Development Center of LINK and will remain a fully electronic performance evaluation system that offers features including an employee self-evaluation and interconnectivity with other components of the Employee Development Center.

While there will be work to do to transition to the new performance management system, there is nothing you need to do at this time. You will receive further direction from your supervisor and/or your human resources representative.
